

## Welcome to our quarterly newsletter Q1-2016.

The [ENTROPY project](#) aims to design and deploy an innovative IT ecosystem targeting at improving energy efficiency through consumers understanding, engagement and behavioural changes.

For the present newsletter we have our featured pilot the "[NAVACCHIO TECHNO PARK](#)". Navacchio Techno Park ([www.polotecnologico.it](http://www.polotecnologico.it)) is located in the municipality of Cascina, just 10 kilometers away from Pisa. Born in 2000, thanks to a massive project of urban requalification, NTP is now a modern technological citadel that covers an area of 18.000 square meters including 4 large buildings, an Incubator ([www.incubatoreimpresa.it](http://www.incubatoreimpresa.it)), a FabLab and a Coworking space. Approximately 500 people work in the 60 high-tech companies (ICT, Energy and Environment, Microelectronics and Robotics) now present in the techno park. You can read more and find great photos from the pilot following the link bellow.

Additionally the ENTROPY project made serious progress and now you are able to find our public deliverable entitled **D1.1 Energy Efficient Technologies**

and frameworks. We welcome you to download and read the deliverable following the link below.

Lastly, to keep up to date with our progress we invite you to our official project site where we will post our progress and results.

The ENTROPY project.

Title		D1.1. Energy Efficient Technologies State-of-the-art Survey		Document version
				Final 1.0
Project number	Project acronym	Project title		
649849	ENTROPY	Design of an Innovative Energy-Aware IT Ecosystem for Motivating Behaviour Changes Towards the Adoption of Energy Efficient Devices		
Contractual start date		Final delivery date		Contractual type/ category
31/12/2015		31/12/2015		R - PU
